School districts in B.C. are receiving funding from programs to support facility and bus upgrades that will improve safety and efficiency, and make schools more comfortable for students.

The School Enhancement Program will help school districts ensure their facilities and building systems are well-maintained through a wide range of improvement projects, including:

- plumbing, boiler and other mechanical upgrades
- heating and ventilation upgrades
- roofing upgrades
- window, lighting and electrical system upgrades
- safety enhancements including fire protection
- flooring upgrades
- washroom upgrades

The Carbon Neutral Capital Program funds energy-efficient upgrades to building features that affect energy use, including:

- heating, ventilation and air conditioning (HVAC) systems
- windows, lighting and electrical systems
- mechanical systems, including boiler replacements

The School Bus Replacement Program funds new and replacement school buses, helping districts to support new routes and ensure transportation services are reliable and safe for students.
